I wish all the success to the college and for the students. For the students of JSS all I can say is We define our limits and thresholds, students have the capability to shape technology and guide as well as redefine a **Nation**. Hence, students should break free from shackles. Each dedicated minute in college can result in shaping your entire life. Its all about taking initiatives, being lab in-charges, having student bodies, cultural activities and having a college running 24X7 which gives an environment of analytical thinking. The college should be your home and a battlefield, where you train, think, sleep, learn, fight, perform and at the end be victorious. **Jai Hind!**

Shared Message from alumni who couldn't attend the meeting in person - 1

Prem Singh (2015) Civil Engineering

I am working as a Junior Engineer at NEW DELHI MUNICIPAL COUNCIL, NEW DELHI. JSS has played a very important role in shaping my career. Apart from engineering I have learned various things from JSS which became very useful for achieving the goal of my life. Faculty of JSS imparted great values in me which made me ready for the outside real world. Through out the course, the faculty were very supportive and inspiring. It's vision of shaping lives through quality education makes it stand tall apart from the other institutions. In my opinion JSS is one of the finest college for engineering and I feel proud to be graduated from this college.
